## Rationale

Creativity is using imagination and original ideas to create something new or innovative. It involves thinking outside the box and creating unique solutions to problems. Creativity can be expressed in many ways, including art, music, writing, and design. Creativity is necessary for inventive thinking in any domain. It is an essential skill for students to develop because it helps them think critically and solve problems innovatively.

In the teaching-learning process, creativity is necessary because it helps students develop critical thinking skills and problem-solving abilities. It also helps students create unique perspectives and ideas, increasing engagement and motivation. Creativity can also help students develop their communication skills and work collaboratively with others. In addition, creativity can help students develop their emotional intelligence and empathy for others.

Creative teaching leads to active learning. There are three forms of creative teaching: teaching about creativity, teaching

## Programme Outcomes

- ? Expound how creativity can be promoted in teaching and learning.
- ? Identify the challenges and issues involved in introducing creativity into higher and technical education programmes.
- ? Develop creative thinking skills among teachers and students.
- ? Foster teachers' ability to create an environment that encourages creativity;
