Rationale

Contract management is the administration of all of the activities around creating, detailing, awarding, and administering a contract. It is also about successfully managing the relationship between two people or organizations that are exchanging a product or service. This course is aimed at building the learner's knowledge and skills of the contracting management processes, principles and practices to meet their organization/project objectives. This training programme will help the technical teachers of civil engineering and allied discipline to understand the latest development in the construction field.

Programme Outcomes

- Enhance the skill in the contract management process
- Explain the relevant type of contract for the given project.
- Decipher contract legal language.
- List the elements of a contract.
- Explain the importance of arbitration clause in contract.
- Explain the types of claims used in contract.
- Use the relevant principles of negotiation to resolve the dispute.
- Effectively administer contracts.

Programme Content

Key concepts in contract management, understanding contract management process, Types of contract, Types of claims and dispute resolution, legal aspects & future prospects, elements of a legally enforceable contract, contract management plan, form of contract, contract award, contract administration

Target Group

Faculty of Civil Engineering and allied disciplines

Coordinator & Co-Faculty

Dr. V.D. Patil

Professor

Department of Civil and Environmental Engineering Education
